

**GEORGIA
WATER
COALITION**

**Dirty Dozen 2021
NOMINATION FORM**

NOMINATIONS DUE September 3, 2021

You are invited to nominate your waterbody (surface or ground water), place or pollution problem for inclusion in GWC’s “Dirty Dozen 2021” report. Please note that nominations are judged by the following primary criteria:

- A major specific decision (that the public can help influence) is pending in the coming year.
- The significance of the waterbody, place, or issue to human and natural communities.
- The magnitude of the threat to the waterbody and associated communities.
- A local group, government, or other organization is already addressing the issue and prepared to handle public relations in support of the nomination.
- *Issues previously nominated and/or selected for prior Dirty Dozen reports, which have not been resolved, are eligible to be resubmitted. A complete summary of activities/new developments on the issue since last year’s nomination is required to assist in the review process and determining if the issue should be listed again.*

Examples:

- A proposed project that threatens local streams or aquifers
- A municipal or industrial wastewater treatment facility failing to meet permit requirements
- A pollution problem which cannot be corrected through existing laws/rules
- A pollution problem that local and state authorities are failing to correct
- A pollution problem resulting from lack of state and/or federal regulatory oversight

Nomination Form

I. GENERAL INFORMATION

Name and location of specific Water Body/Place/Problem

Counties/Municipalities Involved/Impacted

Nominating Group: _____

Other groups or agencies already at work on the issue: _____

Lead Contact: _____

Address: _____

Phone: _____

Website: _____

Email: _____

II. NARRATIVE DESCRIPTION OF WATERBODY, THREAT(S) AND DECISION POINTS

Please generally provide the number of words and all of the additional materials and media indicated below to allow us to understand the issue and to assist with development of the Dirty Dozen Report.

Summary (100-words)

Highlight the most important information by briefly summarizing the significance of the waterbody or place, the threat, and the decision point(s).

Water Body, Place or Issue (150-words)

Explain why the waterbody, place or issue is important. Detail the number of people who use the waterbody for drinking water, recreation, industry, etc. Please note remarkable natural, cultural or historic features as well as any threatened or endangered species impacted.

The Threat (300-words)

Articulate the magnitude, seriousness, and imminence of the threat or existing problem and identify the entity or entities responsible.

Decision Point (200-words)

Describe the best protective action that can be taken to eliminate the threat or problem such as major legislation, policy change, permit issuance, regulatory oversight, or similar action, and identify who is/will be opposed to this action.

III. ADDITIONAL MATERIALS & MEDIA

Please attach:

- A map showing the location of the water body or place you are trying to protect and the problem that you want corrected. Indicate on the map an exact location or area where the problem is occurring.
- Three (3) high quality/high resolution photos (1 MB files are larger) of the waterbody or place you want to protect, including photos of people enjoying or using the area and/or demonstrating why it is special/important.
- Three (3) high quality/high resolution photos (1 MB files are larger) that demonstrate the problem you want corrected or addressed.
- Additional materials like video, press clippings and brochures may also be submitted.

IV. WHAT YOU CAN EXPECT

The Georgia Water Coalition Leadership Team will review and select nominations for inclusion in the report by mid-September. If your nomination is chosen, we will work with you to publicize its inclusion on the "Dirty Dozen" report through regional, state and local media. The Dirty Dozen report will be released in November.

When completed, return the nomination form and narrative, along with supporting material, to Jesse Demonbreun-Chapman at jesse@coosa.org no later than Sept 3, 2021.
